Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 12 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Lang et al.

Lang et al disclose an semiconductor optical amplifier having a gain clamped mode (column 7, line 32) the amplifier comprising: an active waveguide (24) having an input and output side; clad layers (the material adjacent the waveguide) surrounding the active waveguide; and a grating (101 and 102) which is formed partially at both end parts under the input and output sides of the active waveguide.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-11 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lang et al.

Art Unit: 3663

Claims 3, 4, 10, 11 and 14 recite well known structure for coupling an SOA to a communication fiber and, as such, this structure would have been obvious because Lang et al disclose an SOA for use in a communication system.

Claims 5-8 recite well known dimensions and materials that would have been used in the construction of the Lang et al device.

Claims 2 and 9 are suggested by the Lang et al teaching that requires the input grating to have a high reflectivity.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Delprat et al teaches the "prior art" acknowledged by the applicant.

Any inquiry concerning this communication should be directed to Mark Hellner at telephone number 703 306 4155.
